PROJECTS

GlobeVerse | GitHub repo | Live   **April 2025- May 2025**
- Built an interactive, real-time, location-based social platform that allows users to explore and engage with stories, experiences, and cultural moments shared by people around the world.
- Integrated Axios for efficient API communication, ensuring smooth and responsive user interactions.

PortFolio | GitHub repo | Live   **Feb 2025- March 2025**
- Designed and developed a responsive personal portfolio website using React, Vite, and Tailwind CSS with clean UI, custom animations, and optimized performance across all devices.
- Implemented modular architecture with reusable components, dynamic routing (React Router), and interactive sections to showcase projects, skills, and contact information effectively.
- Enhanced user experience with smooth scrolling, hover transitions, and integrated a functional contact form via EmailJS for real-time communication.

CERTIFICATES

Full Stack Web Development | CERTIFICATE   **Jan 2025**
- Gained end-to-end understanding of full stack development using HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB.
- Acquired expertise in Built full-fledged web applications with responsive design, RESTful APIs, and client-server architecture.
